

TEFC HIGH EFFICIENCY

For the past decade, **ADL Products Inc.** has been committed to manufacturing quality. Our line of high efficient totally enclosed fan-cooled electric motors, are made of durable materials which have assisted in the successful operation in many industries. Heavy cast-iron frame, over-sized bearings and class F insulation are just a few of the components that

contribute to long life and rugged construction. Customers across Canada and the United States have been pleased with the

performance of ADL motors. When purchasing your next electric motor try

 you will not be disappointed.
